

# SIGNS OF LIFE

If an alien looked at Earth from far away, how would it know there is life here? Draw and label Earth and Mars and compare the differences. What are the signs of life on each of these planets?

## EARTH

Diameter: 12,742 kilometres

## MARS

Diameter: (approximate)

Hi explorers,  
Mars is *approximately\** half the size of Earth.  
Can you work out the diameter of Mars?
