

ROBOTS IN SPACE

Robots are really useful in space. They can do lots of different jobs, some of which are too difficult or dangerous for humans. While Tim was on the ISS he test drove a rover that was back on Earth. Zap here to watch the video, then design your own robot!

SPACE PROBE
Discovery Device

MARS ROVER
The Brave Explorer

ROBONAUT
Your Robotic Friend

SPACE TELESCOPE
The Long Distance Photographer

MOON BUGGY
The People Mover

MASS TRANSIT LUNAR VEHICLE
The Space Bus

I'm Peter and I'm a robotics expert. Can you design a robot that will help us explore your new space habitat?
