

ANCIENT ASTRONOMY

Zap to explore
our Solar
System

Throughout history, humans have used the night sky as a map, a clock and a calendar. But before telescopes were invented we didn't always understand our Solar System, especially where Earth was in relation to other planets...

Ancient Diagram of our Solar System

What do you notice about the diagram on the left? Can you draw your own diagram of the Solar System based on our knowledge of it today? What have we learnt?
